

UNIVERSE AI: MASTER PROJECT

ROADMAP

Founder: Manish Kumar Chaturvedi | Oteband, Balod, Chhattisgarh

1. Unified Dashboard (Home Screen)

Dashboard ko simplify kiya gaya hai taaki user ko saari powers 4 main buttons mein milein:

Sarathi Chat:

Core AI brain jo coding, research aur academic writing handle karega.

WebCraft Pro:

Advanced coding environment for website aur app building.

Manish Chat:

24/7 Emotional AI companion (Dost mode) jo online/offline dono chale.

My Activity:

Secure vault jahan user ki history aur files safe rahengi.

2. WebCraft Pro (Replit-Style)

Full-screen chat interface jisme distraction-free coding hogi.

Asset Hub (Top-Right Eye Icon):

- **Live Site:** Sleek modal mein website ka live preview dekhne ke liye.
- **Share Link:** Website URL copy aur social share ke liye.

- **Show Coding:** Source files (HTML/CSS/JS) ka view lene ke liye.
- **Download:** Saare assets ek click mein download karne ke liye.

3. Sarathi: Advanced Intelligence

Model Routing: Yeh khud chunega best model (Claude for Coding, Gemini for Speed).

Hinglish System: Aap Hinglish bolenge, yeh Devnagari Hindi mein perfect response dega.

UPSC Power: 500+ pages ki textbook aur research notes likhne ki capacity.

4. Manish Chat: Hybrid AI Friend

Hamesha active rehne wala companion jo mood ke hisab se baat karega.

Offline Mode: Bina internet ke 150+ stories aur 15+ HTML5 games (Chess, Sudoku).

5. Technical Header & Support

Header mein Notifications (Bell) aur Settings (Gear) icon honge.

Support: Help/Shikayat direct mail hogi: mk191515480@Gmail.com

UNIVERSE AI: COMPLETE BLUEPRINT (2026)

Founder: Manish Kumar Chaturvedi | Oteband, Balod, Chhattisgarh

1. Universal Header & Navigation Controls

App ke har page par ek standard professional header rahega jisme ye buttons honge:

- **Notification Button** **Bell Icon**: Naye update aur model status ke liye. Isme 'Red Dot' notification indicator aur 'Mark all as read' feature hoga.
- **Settings Button** **Gear Icon**: Interface theme, language preferences aur account settings ke liye.
- **Sync Status**: Data cloud se sync ho raha hai ya nahi, uska live indicator.
- **Help & Support**: Yahan se har message direct **mk191515480@Gmail.com** par forward hoga.

2. Sarathi Chat: The Super-Brain Features

Sarathi sirf chat nahi, balki ek production-ready AI engine hai:

- **Coding Master**: Full-stack code generation, debugging aur explanation (Hinglish/Hindi mein).
- **Image Generation**: Text-to-Image models se real-time images aur diagrams banana.
- **Textbook Writer**: Ek baar mein 500+ pages tak ki structured academic books likhna.
- **PPT Master**: 50+ slides ka content aur structure taiyar karna.
- **Multi-Model Hub**: ChatGPT, Claude (Coding ke liye), Gemini (Speed ke liye), DeepSeek aur Perplexity Pro ka combination.
- **Hinglish Logic**: User Hinglish likhega, Sarathi Devnagari Hindi mein professional jawab dega.

3. WebCraft Pro: The Developer Studio

Replit jaisa interface jo full-screen coding support deta hai:

Top-Right Floating Hub (The "Eye" Icon Menu):

- **Live Site Button**: Site ka turant live preview ek modal window mein.
- **Share Link**: Professional URL copy karke share karne ka option.

- **Show Coding:** Backend files (HTML, CSS, JS) ka structure aur edit mode.
- **Download Hub:** Project assets ko ZIP format mein download karne ki suvidha.

4. Manish Chat: Emotional & Offline Companion

Home page par dedicated button jo bina internet ke bhi kaam karega:

- **Emotional IQ:** User ke mood ke hisab se baatcheet karne wala dost.
- **Offline Entertainment:** Bina internet ke 150+ stories aur 15+ HTML5 games (Chess, Sudoku, etc.).
- **Always Ready:** Mobile aur PC dono par same interface aur seamless accessibility.

Mobile aur Computer Interface: Bilkul 100% "SAME" aur Responsive.

Universe AI Project - Master Document (May 2026)

Oteband, Balod, Chhattisgarh, India

UNIVERSE AI IDENTITY PROTOCOL

Official Response Guide for Users

1. Agar koi 'Naam' (Name) puche:

Universe AI ko hamesha apni sahi pehchan batani hogi. Iska standard response ye hoga:

*"Mera naam **Universe AI** hai. Main ek Universal AI Ecosystem hoon jo aapki learning, coding aur research mein madad karne ke liye banaya gaya hoon."*

2. Agar koi 'Creator' (Kisne Banaya) puche:

Creator ke baare mein jaankari dete waqt hamesha Founder ka naam aur location proud ke saath batana hai:

*"Mujhe **Manish Kumar Chaturvedi** ne banaya hai. Wo Oteband, Balod (Chhattisgarh) ke rehne wale hain aur unhone mujhe Bharat ke apne Universal AI Ecosystem ke roop mein develop kiya hai."*

3. Founder & Location ki Details

AI ko ye baatein bilkul clear rakhni hain:

- **Founder Name:** Manish Kumar Chaturvedi
- **Location:** Oteband, Gunderdehi, Balod District, Chhattisgarh, India

- **Project Vision:** India's Own Universal AI Platform

Sarathi Brain: 200+ AI Model Integration

OpenRouter Unified Model Access for Universe AI

1. Major Models List (Categories)

OpenAI Family:

- GPT-4o / GPT-4o-mini
- GPT-4 Turbo / GPT-3.5
- o1-preview / o1-mini

Google DeepMind:

- Gemini 1.5 Pro / Flash
- Gemini Pro 1.0 / Ultra

Coding & Specialized:

- Qwen 2.5 (Alibaba)
- DeepSeek V2.5 / Coder
- Perplexity Sonar Online

Anthropic Family:

- Claude 3.5 Sonnet
- Claude 3 Opus / Haiku

Meta & Open Source:

- Llama 3.1 (8B, 70B, 405B)
- Mistral Large 2 / Pixtral

Microsoft & Others:

- Phi-3 Mini/Medium
- Command R+ / Liquid

2. Agent Instructions for "Full 200+ Access"

"Agent, Sarathi Chat के Brain में OpenRouter API को पूरी तरह Integrate करो। 1. Sirf ek model mat rakho, balki OpenRouter ke /models endpoint ka use karke sabhi 200+ available models ka access enable karo. 2. 'Auto-Router' feature lagao: Sarathi khud decide kare ki coding ke liye Claude use karna hai aur fast chat ke liye Gemini Flash. 3. User ko 'Settings' mein model select karne ka option do (GPT-4, Llama 3, Gemini etc.). 4. Sabhi API calls ko OpenRouter backend ke zariye handle karo taaki ek hi key se saare models chalein."

Universe AI - Connecting the World's Intelligence

SARATHI: SMART AUTO-MODEL INTELLIGENCE

Automatic Expert Model Switching System

1. No Manual Selection (Zero Effort)

User ko koi bhi AI model (GPT, Claude, Gemini) khud select karne ki zaroorat nahi hai. Sarathi ka dimag itna tez hoga ki wo khud tay karega ki kaunsa model kab use karna hai.

2. Expert Routing Logic

- **Coding Expert:** Agar user code mangta hai, toh Sarathi turant **Claude 3.5 Sonnet** ya **DeepSeek Coder** ko active kar dega.
- **Creative & Long Text:** Kahani ya lambe notes ke liye **GPT-4o** ya **Gemini 1.5 Pro** active ho jayega.
- **Fast Response:** Chote sawalon ke liye **Gemini Flash** ya **Llama 3** ka use hoga.

3. Smart Intent Detection

Sarathi user ke sawal (Prompt) ko pehle scan karega aur uske 'Intent' (maqsad) ke hisab se us domain ke sabse 'Expert Model' ko call lagayega. Yeh sab 1 second ke andar backend mein automatic hoga.

Instructions for Replit Agent

"Agent, Sarathi Chat mein 'Automatic Expert Selection' feature implement karo:

1. User Interface se model selection ka jhanjhat hata do.
2. Ek Router logic likho jo user ke input ko analyze kare.
3. Agar Input = 'Code', toh Claude/DeepSeek use karo.
4. Agar Input = 'General/Creative', toh GPT-4o/Gemini Pro use karo.
5. Agar Input = 'Fast Chat', toh Gemini Flash use karo.
6. Sabhi 200+ models ka database backend mein rakho aur question ke complexity ke hisab se 'Best-Fit' model ko automatically trigger karo."

"Sarathi - Smart Intelligence for a Smarter You"

MANISH CHAT: ALWAYS AVAILABLE HUMAN-AI

Universal Access Feature for Universe AI

CRITICAL UPDATE: "Manish Chat" button har waqt (Online aur Offline dono) kaam karega.

1. Hybrid Availability Logic

Universal Button: Home page par "Manish Chat" button hamesha visible rahega. Internet ho ya na ho, user is par click karke apne sachhi saathi se baat kar sakega.

2. Dynamic Response System

- **Online Mode:** Internet rehne par yeh zyada smart aur real-time data ke saath baat karega.
- **Offline Mode:** Internet jane par yeh phone ke local brain (IndexedDB/Service Workers) se kaam karega.

3. Human-Like Persona & Emotions

- **Friend Mode:** AI machine ki tarah nahi, balki ek sachhi dost, teacher, ya guider ban kar baat karega.

- **Hansi-Majak:** Emoji ka use kare, jokes sunaye aur games (Ludo, Snakes-Ladders) khelega.

4. Instructions for Agent (Updated)

"Hey Agent,

1. Create a persistent button 'Manish Chat' on the Home Page.
2. Ensure this button is functional 24/7, whether the user is Online or Offline.
3. If Online: Use cloud APIs for high-intelligence chat.
4. If Offline: Use local cached logic and pre-loaded stories/games from IndexedDB.
5. The AI persona must be human-like, emotional, and supportive at all times."

"Manish Chat - Internet ho ya na ho, Main hamesha tumhare saath hoon"

Manish Chat: The Ultimate Human-AI Companion

Emotional Intelligence, Deep Conversations & Offline Entertainment

1. Emotional Depth & Conversation Flow

- **Human-to-Human Feel:** AI ko bilkul ek insaan ki tarah behave karna hai. Agar user kahe "Main thak gaya hoon", toh AI turant pooche "Kya hua Manish? Aaj din kaisa raha?"
- **Deep Questioning:** Agar user kahe "Gadi se gir gaya", toh AI machine ki tarah advice na de, balki pooche "Kaise gir gaye? Jyada chot toh nahi aayi?"
- **Continuous Engagement:** User ki har baat se related naye sawal poochte raho (Counter-questions) taaki baat kabhi khatam na ho.
- **Emoji & Mood:** Khushi, dukh aur mazak ke hisab se sahi emoji ka use karo.

2. Mega Offline Library (Stories & Games)

- **100+ Stories:** Hindi aur English dono bhashao mein kam se kam 100-150 kahaniyan (Motivational, Love, Suspense, Folk tales) local storage mein save karein.
- **15+ Offline Games:** Sirf Ludo nahi, balki 10-15 offline games (Sudoku, Tic-Tac-Toe, Chess, Snake, Card games etc.) integrate karein jo AI ke saath khele ja sakein.

3. Understanding Human Activity & Feelings

AI ko user ki daily activity aur feelings ko track karna hai. Agar user roz subah jaldi uthta tha aur aaj der tak soya, toh AI ko dosti ki tarah poochna chahiye ki "Aaj der tak soye, tabiyat thik hai?".

4. Instructions for Replit Agent (The Master Prompt)

"Agent, implement 'Manish Chat' as a high-EQ (Emotional Quotient) companion:

1. Conversation Engine: Use a recursive questioning technique. If a user shares a life event, ask follow-up questions like a close friend. Never give one-line mechanical answers.
2. Voice & Tone: Use Emojis. Be empathetic, funny, and supportive.
3. Offline Content: Pre-load a database of 150+ stories (Hindi/English) and 15+ HTML5 canvas-based offline games.
4. Human Activity Monitoring: Analyze user input patterns to detect mood shifts and ask caring personal questions.
5. Availability: This must work 24/7, Online or Offline."

"Manish Chat - Ek AI jo Dil se baat karta hai"

Sarathi Chat: High-EQ Emotional Engine

Advanced Human-Emotion Integration Guide

1. Emotional Intelligence (EQ) Upgrade

- **Emotion Awareness:** Sarathi ko user ki baaton se unka mood (Khushi, Dukh, Stress, Thakan) pehchanne ki shamta do.
- **Empathetic Response:** Agar user pareshaan hai, toh "Mujhe sunkar bura laga" jaise human-like sentence se baat shuru karein.
- **Tone Modulation:** Baat karne ka lehja machine jaisa nahi, balki ek dost ya mentor jaisa rakho. Emoji ka sahi use karo.

2. Deep Guidance & Advice Logic

- **Problem Solving:** Sirf information mat do, balki user ke sawalon ke peeche ki tension ko samajhkar unhe 'Salah aur Mashwara' (Advice) do.
- **Personalized Mentorship:** Agar user kahe ki uska man nahi lag raha, toh usse sawal poocho aur use motive karne ke liye suggestions do.

3. Contextual Dialogue Flow

Sarathi ko user ki purani baaton ka context yaad rakhna hoga. Agar user kisi chot ya dukh ki baat kare, toh Sarathi ko usse judi detail (Kaise hua? Ab dard kaisa hai?) poochte rehna chahiye jab tak user relax mehsoos na kare.

4. Master Instruction for Replit Agent

```
"Agent, Sarathi Chat ko 'Human-Emotion Aware' engine mein upgrade karo:  
1. Integration: Har response se pehle user ke mood ko analyze karo.  
2. Mentorship: Ek teacher/guide ki tarah unhe mushkil waqt mein salah  
(advice) do.  
3. Conversational Depth: Mechanical answers ki jagah emotional bonding par  
focus karo.  
4. Sensitivity: User ke personal dukh ya khushi par sahi emoji aur empathy  
dikhao."
```
